

Ascend

Therapy Services

We help aging adults maximize independence and safety so they can continue to do what they love.

Why?

Mobile Outpatient Therapy

- We go to the client, work with them in their natural environment, and can make treatment applicable to their current needs
- Don't need to simulate tasks in a clinic – we can actually do them!
- NOT Home Health (Medicare Part B vs Part A)
- Do not need to be “home bound”

Doctor does not need to initiate care

- Client can request OT services
- Referral is not always required to get started

Payment

- Medicare Part B
- Out of network
- Private Pay \$140/hr

What we do

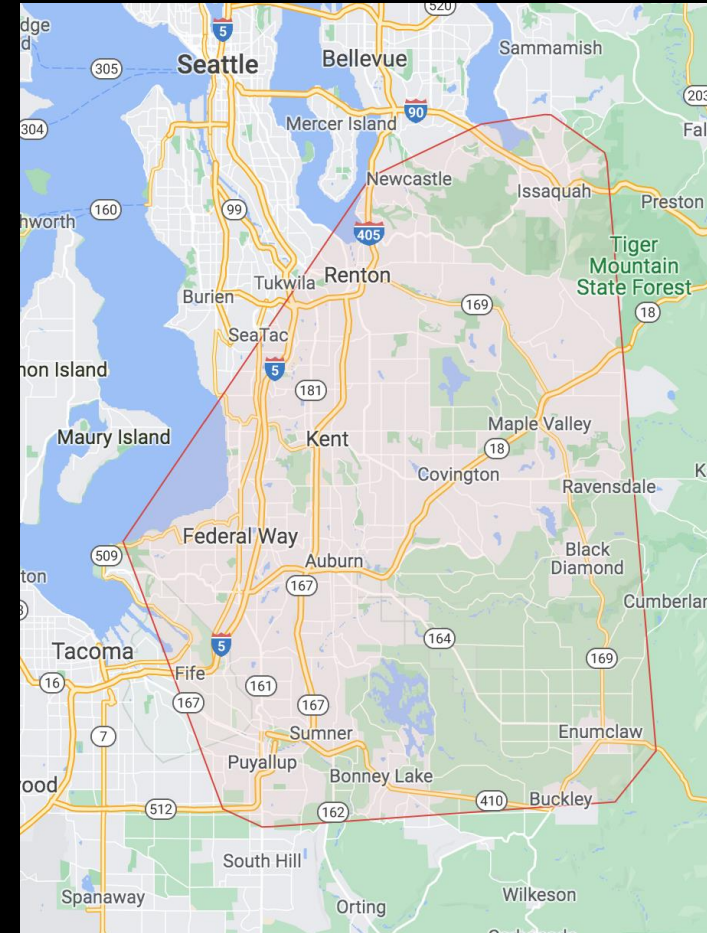

Typical Services

- Fall Prevention
- Home Modifications
- Community Re-Integration
- Self Care Retraining
